SUMMARY

Final-semester CSE undergraduate with a strong analytical mindset, hands-on full-stack development experience and building responsive, user-focused applications. Skilled in modern web technologies including JavaScript, React.js, Node.js, and Express.js, with practical experience in developing RESTful APIs, database-driven systems, and scalable software solutions. Proven ability to deliver academic and personal projects, collaborate effectively in teams, and apply problem-solving skills to real-world challenges. Adaptable, detail-oriented, and eager to contribute to innovative technology-driven initiatives.

TECHNICAL SKILLS

Programming: JavaScript, TypeScript, Java, C++

Frontend: React.js, Next.js, HTML5, CSS3, Tailwind CSS

Backend: Node.js, Express.js, REST APIs

Database: MongoDB, SQL, MySQL, Oracle

Tools: Git, GitHub, VS Code, Linux, Visual Studio 2022

PROJECTS

AgroMart – Full-Stack Farmers Marketplace Web Application

[GitHub](#)

Description: Developed a full-stack marketplace platform connecting farmers directly with customers. The application allows users to browse agricultural products, view product details, and manage product operations through an interactive web interface. Designed backend services and API communication for efficient data handling.

Technologies: HTML | CSS | JavaScript | Node.js | Express.js | JSON File Storage | Git

Key Features:

- Developed RESTful APIs using Node.js and Express.js for product management.
- Implemented CRUD operations including product creation, retrieval, and deletion.
- Integrated frontend interfaces with backend APIs for dynamic data handling.
- Implemented structured data persistence for reliable application operations.

LawConnect – Legal Management System

[GitHub](#)

Description: Developed a C# Windows Forms based legal management application designed to simplify communication between clients, lawyers, and administrators through role-based authentication and database-driven functionalities.

Technologies: C# | .NET Framework | Windows Forms | SQL Server | Visual Studio 2022

Key Features:

- Implemented role-based authentication for clients, lawyers, and administrators.
- Developed user management and lawyer information management modules.
- Integrated SQL Server database connectivity for data storage and retrieval.
- Designed a user-friendly desktop application interface.

Public Fund Collection for Charity and Wellbeing System

[GitHub](#)

Description: Developed a Java-based desktop application for managing charity fund collection activities, donation records, and user operations. The system provides an organized platform for users to contribute funds and maintain charity-related records efficiently.

Technologies: Java | Java Swing | JDBC | MySQL

Key Features:

- Implemented user authentication and role-based access functionality.
- Developed donation management features for recording and tracking fund collections.
- Integrated JDBC connectivity with MySQL database for storing and retrieving application data.
- Designed desktop user interfaces using Java Swing components.

EDUCATION

Bachelor of Science in Computer Science & Engineering

2022 – Present

American International University-Bangladesh (AIUB), Dhaka, Bangladesh

CGPA: 3.1 / 4.00

Higher Secondary Certificate (HSC)

2019 – 2021

Uttara High School and College, Dhaka

GPA: 5.00 / 5.00

ACHIEVEMENTS & ACTIVITIES

- Executive, AIUB Community of Engineering Students (ACES) (2025 – 2026)
- Volunteer, AIUB Community of Engineering Students (ACES) (2024 – 2025)
- Participated in poster presentations and technical competitions, demonstrating technical communication, presentation, and teamwork skills.
